

Use AirPlay to stream video or mirror your device's screen

Stream video from your iPhone, iPad, or iPod touch

1. Connect your device to the same Wi-Fi network as your Apple TV or AirPlay 2-compatible smart TV.
2. Find the video that you want to stream.
3. Tap . In some third-party apps, you might need to tap a different icon first.

* In the Photos app, tap , then tap .

4. Choose your Apple TV or AirPlay 2-compatible smart TV. [Need help?](#)

To stop streaming, tap  in the app that you're streaming from, then tap your iPhone, iPad, or iPod touch from the list.

*Some video apps might not support AirPlay. If you can't use AirPlay with a video app, check the App Store for tvOS to see if that app is available on Apple TV.

If video automatically streams to an AirPlay device

Your device might automatically stream video to the Apple TV or AirPlay 2-compatible smart TV that you frequently use. If you open a video app and see  in the upper-left corner, then an AirPlay device is already selected.

To use AirPlay with a different device, tap , then tap another device, or tap "iPhone" to stop streaming with AirPlay.

Stream video from your Mac

5. Connect your Mac to the same Wi-Fi network as your Apple TV or AirPlay 2-compatible smart TV.
6. On your Mac, open the app or website that you want to stream video from.
7. In the video playback controls, click .
8. Select your Apple TV or smart TV. [Need help?](#)

To stop streaming video, click  in the video playback controls, then choose Turn Off AirPlay.

Mirror your iPhone, iPad, or iPod touch

Use Screen Mirroring to see the entire screen of your iPhone, iPad, or iPod touch on your Apple TV or AirPlay 2-compatible smart TV.

9. Connect your iPhone, iPad, or iPod touch to the same Wi-Fi network as your Apple TV or AirPlay 2-compatible smart TV.
10. Open Control Center:
 - On iPhone X or later or iPad with iPadOS 13 or later: Swipe down from the upper-right corner of the screen.
 - On iPhone 8 or earlier or iOS 11 or earlier: Swipe up from the bottom edge of the screen.
11. Tap  Screen Mirroring.
12. Select your Apple TV or AirPlay 2-compatible smart TV from the list. [Need help?](#)
13. If an AirPlay passcode appears on your TV screen, enter the passcode on your iOS or iPadOS device.

Your TV uses your iOS or iPadOS device's screen orientation and aspect ratio. To fill your TV screen with the mirrored device screen, change your TV's aspect ratio or zoom settings.

To stop mirroring your iOS or iPadOS device, open Control Center, tap Screen Mirroring, then tap Stop Mirroring. Or press the Menu button on your Apple TV Remote.

Mirror or extend your Mac display

With Apple TV or an AirPlay 2-compatible smart TV, you can mirror the entire display of your Mac to your TV or use your TV as a separate display.

14. Connect your Mac to the same Wi-Fi network as your Apple TV or AirPlay 2-compatible smart TV.
15. On your Mac, click  in the menu bar at the top of your screen. If you don't see , go to Apple menu > System Preferences > Displays, then select "Show mirroring options in the menu bar when available."
16. Choose your Apple TV or AirPlay 2-compatible smart TV. [Need help?](#)
17. If an AirPlay passcode appears on your TV screen, enter the passcode on your Mac.

Casting from an Android Device

Casting shortcut in the quick settings panel. Here's how:

1. Swipe down from the top of your Android device to reveal the Quick Settings panel.
2. Look for and select a button labeled Screen cast.
3. A list of Chromecast devices on your network will show up. Select the one that's connected to your TV, and a few seconds later your Android phone's screen will show up.
4. Stop casting your screen by following the same steps and selecting Disconnect when prompted.

If you can't find the Screen Cast option in the Quick Settings panel, tap on the pencil icon to edit which options are available and add the Screen Cast button.
